\*For 1999 and 2000, the Annual Return/Report Form 5500 Series data do not include a significant number of plans, some of which have assets greater than \$2.5 billion. The 2003 data are preliminary and incomplete — about 5 percent of the plans are missing. To obtain the aggregate totals, the missing plans are imputed by: 1) identifying plans that existed in the prior year that are not in the current year; 2) projecting these plans to the current year; and 3) applying the average rate of growth for different measures (assets, participants, etc.) from those plans that are observed in the prior and current year.

The 2003 data are preliminary and incomplete — about 5 percent of the plans are missing. To obtain the aggregate totals, the missing plans are imputed by: 1) identifying plans that existed in the prior year that are not in the current year; 2) projecting these plans to the current year; and 3) applying the average rate of growth for different measures (assets, participants, etc.) from those plans that are observed in the prior and current year.

## About the Center

The Center for Retirement Research at Boston College was established in 1998 through a grant from the Social Security Administration. The Center's mission is to produce first-class research and forge a strong link between the academic community and decisionmakers in the public and private sectors around an issue of critical importance to the nation's future. To achieve this mission, the Center sponsors a wide variety of research projects, transmits new findings to a broad audience, trains new scholars, and broadens access to valuable data sources. Since its inception, the Center has established a reputation as an authoritative source of information on all major aspects of the retirement income debate.
