

# FACTS ABOUT CALSAVERS

## Overview

California has established an auto-IRA program that requires employers with 5 or more workers and no retirement plan to automatically enroll their employees, who are allowed to opt out. California was the first state to study the feasibility of an auto-IRA, and the program was adopted in 2016. The program went live in January 2019, with full rollout slated for June 2022.

To date, California has 6,566 participating employers and 209,033 worker accounts (see Table 1). Currently, it is not yet the largest auto-IRA program in the country, in terms of employers, but it will be by far the largest once its rollout is complete.

TABLE 1. OVERVIEW OF CALSAVERS

Design	Rollout	Status (as of November 30, 2021)
⇒ Mandated for employers with 5+ employees and no retirement plan	⇒ Rollout to employers in progress	⇒ 6,566 employers facilitating payroll contributions
⇒ 5% default contribution rate, with auto-escalation of 1 ppt per year up to 8%	⇒ Rollout to workers in progress	⇒ 209,033 workers with a funded account
⇒ Annual penalty of \$250 per eligible employee	⇒ Rollout to be completed by June 2022	⇒ \$154.3 million in assets

## Employers

So far, 6,566 employers in California have set up their payroll systems to process deductions to CalSavers (see Table 2 on the next page), but this number will grow substantially as the program continues to roll out. Like Oregon and Illinois, California has been rolling out to the largest employers in the state first.

Employers subject to the mandate that do not comply must pay an annual fine of \$250 per eligible employee if noncompliance extends 90 days or more after the notice. If found to be in noncompliance 180 days or more after the notice, an additional penalty of \$500 per eligible employee is incurred.

TABLE 2. NUMBER OF CALSAVERS EMPLOYERS WITH PAYROLL SET UP

Quarter	Employers
2021-Q1	3,280
2021-Q2	4,312
2021-Q3	5,929
2021-November	6,566

Source: CalSavers reports, Office of the State Treasurer (2021).

## Employees

To date, the number of employees with assets in CalSavers has reached 209,033. Given the early stage of the program, average account balances are modest. Contributions made in the first 30 days are invested in a money market fund; after that point, the account balance and future contributions are defaulted into a target-date fund. Only about 30 percent of eligible workers have chosen to opt out of participating (see Table 3). CalSavers is also open to the self-employed and workers not covered under the mandate.

TABLE 3. SELECTED CALSAVERS EMPLOYEE OUTCOMES

Period	Number of account (with balances)	Average account balance	Reported opt-out rate <sup>a</sup>
2021-Q1	128,818	\$425	29%
2021-Q2	158,335	569	30
2021-Q3	193,622	652	30
2021-November	209,033	738	30

<sup>a</sup> The participation rate is not necessarily equal to one minus the opt-out rate. For more discussion on participation rates, see [Quinby et al. \(2019\)](#).

## Assets

The program, which is intended to eventually become financially self-sufficient, had assets under management of \$154.3 million by the end of November 2021 (see Table 4 on the next page). To pay for its operating costs, CalSavers charges an annual fee of 0.83 percent to 0.95 percent (based on the investment option) on program assets.

TABLE 4. ASSETS IN CALSAVERS

---

Period	Assets (in millions)
2021-Q1	\$54.8
2021-Q2	90.1
2021-Q3	126.1
2021-November	154.3
